1.0_INTRODUCTION:

1.1_Design Team:

DAP Architecture is an architectural, urban design and interior design practice whose reputation for design excellence and innovation has grown steadily since our formation in early 2011. During this time, we have completed many design-led projects across the UK. These range from housing and commercial, education and mixed-use developments to urban regeneration and master planning.

The Team

Working from offices in London, Chelmsford and Birmingham, our dedicated and enthusiastic team thrive on new creative challenges. The driving force behind our success is our architectural insight and innovative approach, which is always appreciated by clients. A 'can-do' attitude permeates the entire practice. Inquiring and adventurous mind-set are the hallmarks behind every DAPA project.

The team at DAP Architecture bring passion to every project. A special blend of experience and originality enables us to transform innovative ideas into inspired designs. This inspiration derives in turn from architectural insight. Set in the context of a scheme's immediate environment, our aim is to combine aesthetic and practical elements to provide every client with an optimal, holistic solution.

Our Approach

Designing buildings and environments that inspire and respect the integrity of future communities demands a detailed approach in pursuit of the ultimate vision. We believe one of the key principles behind a successful project is to develop an intensive understanding of its cultural, social and environmental contexts through the professional application of urban design analysis.
